Spring Term 2019   Dr. Vasiliki Kalavri
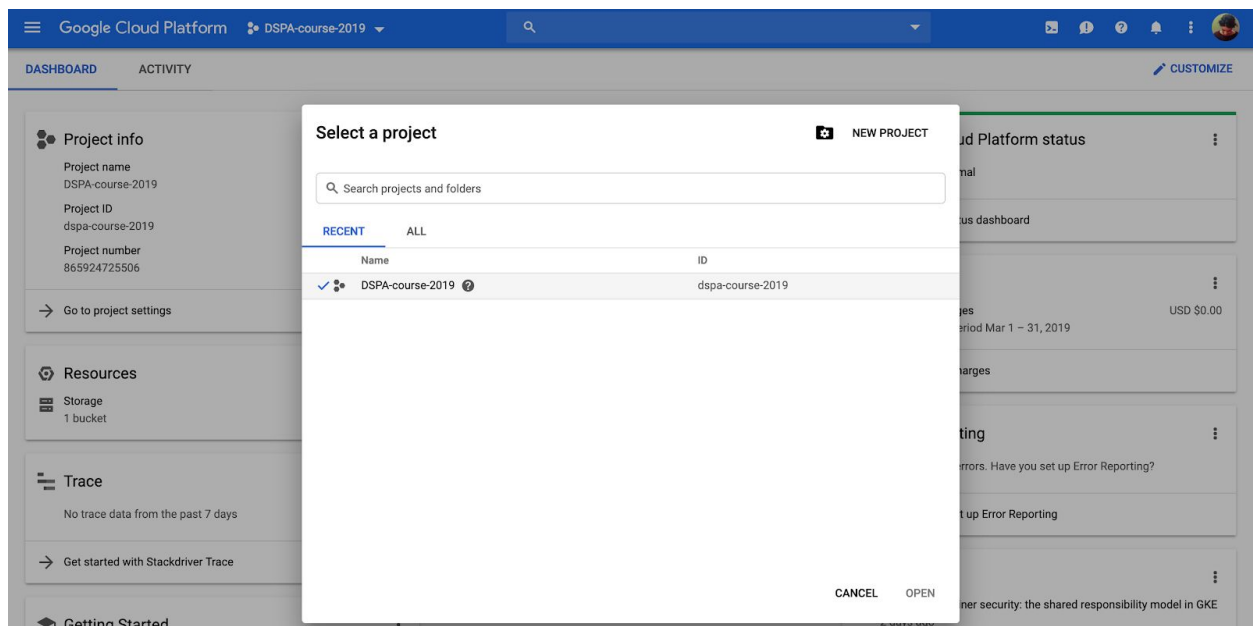

Data Stream Processing and Analytics
## Assignment 6

In this assignment you will learn:
- How to use the Google Cloud Platform tool and the Cloud Shell
- How to write a simple Dataflow pipeline and run it locally and on the cloud

**To complete this assignment you need to have retrieved your Google Cloud Platform coupon!**

Visit the Google Cloud Platform Console at https://console.cloud.google.com and create a new Project "DSPA-course-2019":

Next, activate the Cloud Shell by clicking on the button ">_" on the right of the top toolbar:

You should see the Cloud Shell appearing in the bottom of your screen:

Finally, follow the instructions as described in the following codelab:

https://codelabs.developers.google.com/codelabs/mlimmersion-simplepipeline-java/index.html#0

NOTE: Ignore any references to "Lab0" and "Qwiklabs".

This assignment has no graded deliverables.
